Dear Mr. Choi:

I would like to express my appreciation for your willingness to serve as a member of Naval Air Station Glenview's Installation Restoration Program Technical Review Committee. The Technical Review Committee (TRC) is being formed for oversight of the creation and implementation of The Navy's Installation Restoration Program (IRP). The IRP is designed to conform to the scope and purpose of The National Oil and Hazardous Substances Contingency Plan (NCP). This program involves the investigation and, if necessary, remediation of past hazardous waste disposal sites. The TRC consists of Federal and State Environmental Protection Officials, Navy Environmental personnel, and community representatives.

We are pleased you will represent the USEPA Region V on the Technical Review Committee. The initial meeting of the TRC has been scheduled for Wednesday, 14 Aug 1991, in the station's Conference Room located in Building 41. The meeting will begin at 9:00 A.M. and should last approximately two hours.

Please let us know if you will be able to join us for this important initial meeting of the NAS Glenview TRC. If you are unable to attend, we request you send a technical representative in your place. Responses and requests for further information regarding the Installation Restoration Program should be directed to LCDR Mark Kimball, Code 70, Building 16, NAS Glenview, IL 60026, telephone 708-657-2124.

Sincerely

W. D. Vandivort  
Captain, U.S. Naval Reserve  
Commanding Officer
